

Personal protective equipment

Introduction

The "Personal Protective Equipment" training course was developed by a team of professionals who wanted to put efficiency measures and compliance with occupational health and safety standards at the forefront. This 60-minute training session can be taken at any time.

Description

Wearing personal protective equipment is a common feature for most workers. Because of the many hazards in the workplace, it is important for each worker to know their importance. Depending on the environment in which you work, you will be able to identify the risks you are exposed to during your work and choose the right equipment. You will also know the main characteristics of each PPE in terms of classifications, standards and risks.

Target Population

The training is for all workers who face hazards in their daily lives. Regardless of the occupation, sector or company, personal protective equipment affects everyone.

Prerequisites

There are no prerequisites for this training. No other training or experience is required to take this course.

Targeted Learning and Targets of Learning Modules

Module 1	Introduction
Module 2	Overview
Module 3	Safety helmet
Module 4	Eye and face protection
Module 5	Hearing protectors
Module 6	Respiratory protective equipment
Module 7	Gloves
Module 8	Safety clothing
Module 9	Protective footwear
Module 10	Safety harness
Module 11	Conclusion

Evaluation Method of Learning

The development of the targeted competencies will be evaluated so as to ensure full understanding after each of the modules. To proceed to the next module, it is necessary to correctly answer all the questions of the module in progress. In the event of failure, you will have to take this module again. A series of questions in the form of true or false or multiple choice will be asked throughout the different modules. The success threshold is 100%.

Note on integrity, plagiarism and fraud

Given the seriousness of the approach and given the importance of the knowledge gained through this training course, the team of OHStraining Inc. invites you to respect the integrity of the training and its questionnaires and suggests you to answer to the best of your knowledge, that is, without help and without plagiarism.

Teaching and Learning Method

This training course was created based on the skills training approach. This notion promotes not only the acquisition of knowledge, but also the integration of knowledge in practice. The learning method for this course is online training and focuses on interactivity, dynamism and self-learning. The training will be done at the pace of the learner and according to his/her availability.

The masculine gender used in this document and in the content of the modules refers to both women and men.
