

Bucket Truck

Introduction

The "Bucket Truck" training course was developed by a team of professionals who wanted to improve efficiency measures and respect for occupational health and safety standards. This 60-minute training course can be taken at any time.

Description

Carrying out work necessitating the use of a bucket truck requires the application of safe working methods and compliance with established standards. In order to be able to operate a bucket truck safely, it is essential that the user be familiar with their components and methods of use. In addition, he/she must know the related risks and must be able to control them in order to avoid difficult or hazardous situations.

Target Population

This training course is primarily intended for regular and casual workers who want to carry out work using a bucket truck. Whether you work in the telecommunications or construction field, or you are simply interested in acquiring new skills, this training is for you.
