

Hearing Protection

Introduction

The "Hearing Protection" training course was developed by a team of professionals who wanted to improve efficiency measures and respect for occupational health and safety standards. This 60-minute training course can be taken at any time.

Description

Despite decades of regulation, noise-induced hearing loss continues to be one of the most common occupational injuries in many industries. It is important that the means of prevention are implemented effectively to prevent the transmission of high noises, which can cause damage to the ear. To do this, it is essential to contain noise at the source. In addition, the application of good working methods and compliance with safety rules are essential conditions for effective prevention.

Target Population

This training course is intended for the majority of sectors that face a high-noise environment every day.

Prerequisites

There is no prerequisite for this training course. No other training or experience is required to take this training.

Targeted Learning and Targets of Learning Modules

Module 1	Introduction
Module 2	Statutory Framework
Module 3	Health Effects of Noise
	<ul style="list-style-type: none"> › Occupational deafness › Acoustic trauma › Tinnitus › Temporary or permanent hearing loss › Presbycusis › Recovery time
Module 4	Preventive Measures
	<ul style="list-style-type: none"> › Reduce noise at the source › Isolate any noise source or substation exposed to noise exceeding the standard › Soundproofing workspaces › Protect workers' ears › Administrative measures
Module 5	Hearing Protectors
	<ul style="list-style-type: none"> › Choosing a hearing protector › Types of hearing protectors › Advantages and disadvantages › Maintenance
Module 6	Conclusion

Evaluation Method of Learning

The development of the targeted competencies will be evaluated so as to ensure full understanding after each of the modules. To proceed to the next module, it is necessary to correctly answer all the questions of the module in progress. In the event of failure, you will have to take this module again. A series of questions in the form of true or false or multiple choice will be asked throughout the different modules. The success threshold is 100%.

Note on integrity, plagiarism and fraud

Given the seriousness of the approach and given the importance of the knowledge gained through this training course, the team of OHStraining Inc. encourages you to respect the integrity of the training and its quizzes and suggests that you answer to the best of your knowledge, that is, without help and without plagiarism.

Teaching and Learning Method

This training course was created based on the skills training approach. This notion promotes not only the acquisition of knowledge, but also the integration of knowledge in practice. The learning method for this course is online training and focuses on interactivity, dynamism and self-learning. The training will be done at the pace of the learner and according to his/her availability.
