

Hot Work

Introduction

The "Hot Work" training course was developed by a team of professionals who wanted to improve efficiency measures and respect for occupational health and safety standards. This 60-minute training course can be taken at any time.

Description

How can we explain the fact that some companies tolerate jeopardizing their labour force and production tools by permitting hot work to be done unattended? Not to mention that the growing trend of subcontracting increases the severity of the problem, as subcontractors generally have no knowledge of the manufacturing processes and risks of the institution for which they work? Therefore, the challenges are huge. This is why workers must remain aware of the impact they have on their own safety, as well as that of other workers. They must know all the safety rules linked with their profession.

Target Population

This training course is intended for any worker involved, directly or indirectly, in work that can increase fire hazards in his/her work environment.

Prerequisites

There is no prerequisite for this training course. No other training or experience is required to take this training.

Targeted Learning and Targets of Learning Modules

Module 1	Introduction
	<ul style="list-style-type: none">› Introduction› Statutory framework
Module 2	The Risks of Accidents
Module 3	Hot Work
	<ul style="list-style-type: none">› What is hot work?› Personal protective equipment

	<ul style="list-style-type: none">› The hot work permit› Fire extinguisher usage
Module 6	Conclusion

Evaluation Method of Learning

The development of the targeted competencies will be evaluated so as to ensure full understanding after each of the modules. To proceed to the next module, it is necessary to correctly answer all the questions of the module in progress. In the event of failure, you will have to take this module again. A series of questions in the form of true or false or multiple choice will be asked throughout the different modules. The success threshold is 100%.

Note on integrity, plagiarism and fraud

Given the seriousness of the approach and given the importance of the knowledge gained through this training course, the team of OHStraining Inc. invites you to respect the integrity of the training and its questionnaires and suggests you to answer to the best of your knowledge, that is, without help and without plagiarism.

Teaching and Learning Method

This training course was created based on the skills training approach. This notion promotes not only the acquisition of knowledge, but also the integration of knowledge in practice. The learning method for this course is online training and focuses on interactivity, dynamism and self-learning. The training will be done at the pace of the learner and according to his/her availability.
