

Event reporting, investigation, and analysis

⌚ Duration : 30min

FRENCH

ENGLISH

SPANISH

In the context of accidents and occupational diseases, it is essential to follow a rigorous and structured approach to investigate and analyze incidents.

With this in mind, this training course will help you understand the principles, techniques, operation, and terms used in the investigation and analysis of events and to learn how to apply these skills to improve workplace safety.

🎯 Target audience

It is intended for all members of the organization, whether they are managers or workers.

☰ Teaching and evaluation methods

The learning method for this online training is based on interactivity, dynamism and self-learning. The training will be done at the pace of the learner and according to his/her availability. Your understanding and skills will be evaluated at the end of each module.

You'll need to correctly answer all the questions in the current module, which will be presented in « true or false » or « multiple choice » questions to continue your progress. If you fail, you'll have to repeat the module.

🔑 Legal notice

There are no legal notice associated with this training. No other training or experience is required.

⚖️ Intellectual integrity

Given the seriousness of the approach and the importance of the knowledge acquired through this training, the team of OHStraining invites you to respect the integrity of the training and its questionnaires.

We suggests you answer to the best of your knowledge, that is, without help and without plagiarism.
